

L5[®] C Competition

The L5C was developed for serious 3 Gun and tactical rifle competitive shooters. With a maximum capacity of 48 rounds the L5C can reduce magazine changes during long stages, resulting in quicker times.

Utilizing a precision machined coupler we've combined a standard L5 30 round magazine body with a modified L5 body. The coupler ensures the bodies are accurately aligned, maintaining the internal constant curve geometry, ensuring reliable feeding.

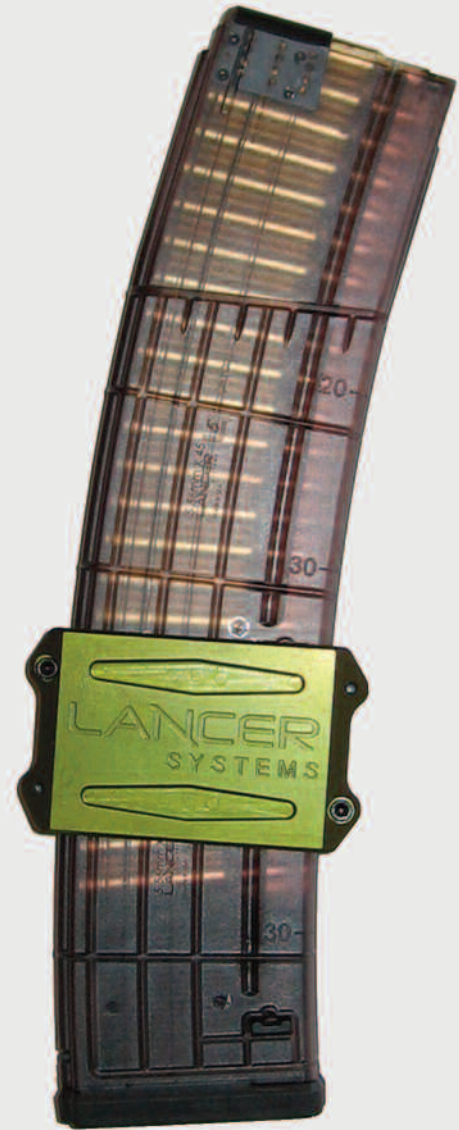

The L5C comes completely assembled and ready for action.

Features

- Made in the USA
- Maximum capacity of 48 rounds, download required for reloading with a closed bolt.
- Translucent polymer bodies that are impact resistant through a wide range of temperatures.
- The L5 body design incorporates a constant radius geometry that facilitates follower/spring travel.
- Precision machined aluminum coupler accurately aligns the magazine bodies, ensuring the internal constant curve geometry is maintained.
- Chrome Silicon Spring
- Hardened steel feed lips are permanently molded into the body, feed lips are PTFE coated for corrosion resistance.
- Rubber coated bottom.
- Easy to disassemble and maintain.

Benefits

- Minimize magazine changes
- Know how many rounds you have
- Lightweight
- Reliable:
 - Steel feed lips provide consistent, positive feeding
 - Body, coupler and follower are engineered for maximum reliability
 - The magazine's readiness can be determined visually
