LANCER SYSTEMS INTRODUCES THE L5COMPETITION 48 ROUND MAGAZINE FOR AR15 RIFLES

Allentown, PA (April 2009) Lancer Systems LP is please to announce the Lancer L5Competition translucent magazine.

The L5Competition (L5C) was developed for serious 3 Gun and tactical rifle competitive shooters. With a maximum capacity of 48 rounds the L5C can reduce magazine changes during long stages, resulting in quicker times.

Utilizing a precision machined coupler we've combined a standard L5 30 round magazine body with a modified L5 body. The coupler ensures the bodies are accurately aligned, maintaining the internal constant curve geometry, ensuring reliable feeding.

The L5C will be sold as an assembled unit, ready for action.

Features:

- Made in the USA
- Maximum capacity of 48 rounds, download required for reloading with a closed bolt.
- Translucent polymer body that is impact resistant through a wide range of temperatures.
- The L5 body design incorporates a constant radius geometry that facilitates follower/spring travel.
- Precision machined aluminum coupler developed and supplied by Nordic Components that accurately aligns the magazine bodies, ensuring the internal constant curve geometry is maintained.
- Chrome Silicon Spring
- Hardened steel feed lips are permanently molded into the body; feed lips are PTFE coated for corrosion resistance.
- Rubber coated bottom.
- Easy to disassemble and maintain.

Lancer Systems is a team of engineers and manufacturing experts that are committed to providing innovative material solutions to the warfighter. Our focus area in the small arms arena is in the application of advanced lightweight materials to decrease weapon system weight and increase operator efficiency.
